- User friendly
- No return of transport damaged goods
- Eco-friendly packing material
 - easy to dispose
 - recycled packing material
 - non-toxic glue
- Less packing volume
- Possible to reuse
- Enables automated unpacking

OLD PACKAGING

NEW PACKAGING

Reflections from one customer!

- "For the parts we pack with **FLEXICOMB's** we get zero (0) claims for damaged goods due to transport."
- "We save up to **50% of packing time** on some products, but normally between **10-35%**"
- "We also deliver extra **FLEXICOMB's** with some products. They are to be used after for example anodising, machining or sub-assembly outside our factory!"

The **FLEXICOMB** makes it easy for your staff to unpack fast and efficient - without scratches, dents and "Black spots"!

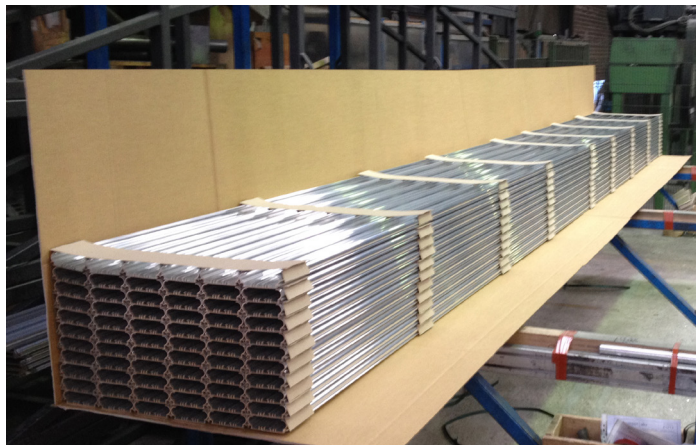

Wallsten Technology Group:

FLEXICOMB CONCEPT

- Intelligent packaging solutions for the aluminium extrusion industry

With **FLEXICOMB** the products will be separated from each other and stabilized with a minimum of space needed. This can be in profile baskets, on pallets or in cardboard boxes.

Reflections from one customer!

- *We can now use **FLEXICOMB**'s for about 60% of our profiles and parts but we see the possibility for up to 70-80%.*
- "We have about the same cost for material but can pack much faster (saving time). 15-25% in average and in specific cases up to 45%."
- "We have reduced cost for return of damaged goods but the exact figure of savings for this is difficult to calculate. But it is definitely a saving!"

BENEFITS with the **FLEXICOMB** CONCEPT

- Time saving (packing and inspection)
- Just-in-time production
- User friendly
- Reduced packaging cost
- Reduced packaging methods
- No return of transport damaged goods
- Eco-friendly packing material
 - easy to dispose
 - recycled packing material
 - non-toxic glue
- Stable and volume reducing
- Possible to reuse through out the value chain
- Enables automated unpacking
- Professional packaging

The **FLEXICOMB** can be produced with different set-ups, paper qualities and types, all according to your needs!

As standard the **FLEXICOMB** is made of a recycled paper and a non-toxic hot melt glue. This makes the **FLEXICOMB** environmentally friendly.

Reflections from customers!

- "Much less damages from transport."
- "For the parts packed with **FLEXICOMB**'s the return of damaged goods is close to zero (0)."
- "We save cost with **FLEXICOMB**'s on reduced packing time for many parts and extrusions"
- "We save cost on reduced number of packaging methods."
